

**Amendments to the Specification:**

After the title, please insert the following subheading and paragraph:

**CROSS REFERENCE TO RELATED APPLICATIONS**

[0001] This application is entitled to the benefit of and incorporates by reference essential subject matter disclosed in International Patent Application No. PCT/DK2004/000390 filed on June 8, 2004 and Danish Patent Application No. PA 2003 00859 filed June 10, 2003.

Before paragraph [0002], please amend the following subheading:

~~Introduction~~ **FIELD OF THE INVENTION**

Before paragraph [0006], please amend the following subheading:

~~Description of the invention~~ **BRIEF SUMMARY OF THE INVENTION**

Before paragraph [0017], please amend the following subheading:

~~Detailed description of the invention~~ **BRIEF DESCRIPTION OF THE  
DRAWINGS**

Before paragraph [0020], please insert the following subheading:

**DETAILED DESCRIPTION OF THE INVENTION**

Please amend the following paragraphs [0021] and [0022] as follows:

[0021] Figs. 2A, 2B and 2C show three different sleeves for use in the assembling method according to the present invention. The sleeve in Fig. 2A has a tapered outer surface 21 to be pressed into engagement with the opening of the house. The opening of the house has ~~[[in]]~~ an inner peripheral surface 22 which is parallel and coaxial to the centre axis 23. Upon application of an axially directed pressure to the sleeve, the outer surface 21 and the inner surface 22 is pressed

a tapered outer surface 21 to be pressed into engagement with the opening of the house. The opening of the house has ~~[[in]]~~ an inner peripheral surface 22 which is parallel and coaxial to the centre axis 23. Upon application of an axially directed pressure to the sleeve, the outer surface 21 and the inner surface 22 is pressed into contact with each other. Due to the pressure, the sleeve is deformed, whereby the inner peripheral surface thereof 24 is squeezed into contact with the component 25, e.g. a pressure sensor. The component 25 is not shown in Figs. 2B and 2C.

[0022] In Fig. 2B, the sleeve has a tapered outer surface 26 to be pressed into engagement with a correspondingly tapered inner surface ~~[[27of]]~~ 27 of the opening upon application of an axially directed pressure to the sleeve.

Please insert the following new paragraph [0024]:

[0024] While the present invention has been illustrated and described with respect to a particular embodiment thereof, it should be appreciated by those of ordinary skill in the art that various modifications to this invention may be made without departing from the spirit and scope of the present invention.
